

BALISTIK®

MAPP No. 18129

SEPTEMBER 2022

TANK-MIX COMPATIBILITIES

This tank mix summary sheet provides information in addition to what appears on product labels. The following products have been tested for physical compatibility with **BALISTIK**, but the information does not warrant the efficacy of the tank mix, so growers use these mixes at their own risk. For tank mixes of more than two products which are not specifically listed, only what is known about the products when in a two-way mix is shown, users must make their own judgment about the more complicated mixes which they may choose to use at their own risk. UPL Europe Ltd (UPL) accepts no liability for physical compatibilities; therefore use is at grower's own risk.

Brand names listed below may be changed for alternative brands provided they are the same active, active concentration and formulation type.

IMPORTANT NOTES:

- Tank mixes should only be made within the label recommendations of every product in the application.
- This information is in addition to the **BALISTIK** stewardship guidelines, and only mixes which adhere to the stewardship will be supported.
- The mixes below have been tested with the inclusion of a non-wetted water conditioner.
- The addition of a non-wetted water conditioner will improve efficacy in hard water areas and is strongly recommended.

HERBICIDES

Kerb Flo 500¹

INSECTICIDES

CYTHRIN MAX EC	Hallmark with	InSyst ²	Lambdastar
CYTHRIN 500EC	Zeon Technology	Karis 10 CS	Tepekki ²
